OBJECTIVE

IT Support Engineer with hands-on experience in **Level 1 & Level 2 IT Support, Application Support, and Desktop Administration** within a **BFSI** environment. Skilled in **Windows troubleshooting, LAN/IP configuration, network diagnostics, and email client support (IMAP/SMTP/POP)**. Experienced with **Microsoft 365 administration, antivirus management, proxy configuration, basic firewall operations, and IT asset management**. Proficient in vendor coordination, **server monitoring, EPBAX support, and end-user data backup**, with a strong focus on system uptime, security, and efficient incident resolution.

EXPERIENCE

IT Associate Manager

Shreni Shares Limited

July 2025 - Present

- Provide Level 1 & Level 2 IT support for desktops, laptops, printers, and trading workstations within a SEBI / NSE / BSE regulated BFSI environment.
- Ensure smooth functioning of live trading and back-office systems, providing technical support during market hours.
- Perform BOD (Beginning of Day) and EOD (End of Day) activities, including system health checks, connectivity verification, and readiness validation for trading applications.
- Administer and support the MoneyMaker trading platform, including user access management, issue troubleshooting, and ensuring system readiness during trading hours.
- Support network operations, including LAN troubleshooting, IP configuration, DNS checks, and internet/proxy configuration.
- Manage endpoint security, including antivirus installation, updates, and monitoring across user systems.
- Provide Active Directory support, including user account management, password resets, and access control.
- Assist with data backup operations and recovery procedures to ensure data protection and system availability.
- Maintain IT asset inventory, including hardware provisioning, tracking, and lifecycle management.
- Coordinate with third-party vendors for hardware repairs, warranty services, and infrastructure support.
- Provide EPBAX support for internal telephony systems and troubleshoot communication issues.
- Maintain technical documentation and operational records, supporting compliance and IT reporting within the financial environment.

IT Support Associate

Gracious Exports

Dec 2024 - June 2025

- Provided first-level desktop, laptop, and printer troubleshooting for end users.
- Assisted employees with MS Office support and email login configuration (Outlook / IMAP / SMTP).

SKILLS

End-User Computing & IT Support

- **Desktop / Laptop Administration** – Hardware troubleshooting, OS installation, driver management, software deployment, and system performance optimization.
- **Printer Management** – Installation, configuration, and troubleshooting of local and network printers.
- **End-User Support** – Incident resolution, remote support, and system diagnostics.

Email & Collaboration Systems

- **Microsoft 365** – User administration, mailbox troubleshooting, password resets, and account management.
- **Microsoft Outlook** – Email configuration and troubleshooting.
- **Email Protocols** – IMAP / SMTP / POP configuration and support.
- **cPanel Email Management** – Private domain mailbox creation, password resets, and storage monitoring.

Networking & Connectivity

- **LAN / WAN Support** – Network connectivity troubleshooting and device configuration.
- **IP Addressing** – DNS, DHCP configuration and troubleshooting.
- **Internet & Proxy Configuration** – Managing proxy settings and resolving connectivity issues.

Server & Infrastructure Support

- **Windows Server Administration** – Server monitoring, patch updates, and routine maintenance.
- **Active Directory** – User account management, password resets, and access control.
- **Server Room Monitoring** – Infrastructure monitoring and system availability checks.

Security & Endpoint Protection

- **Antivirus Management** – Endpoint antivirus installation, updates, and monitoring.
- **Firewall Monitoring** – Basic firewall monitoring and connectivity troubleshooting.
- **Endpoint Security** – Monitoring system health and enforcing security policies.

Backup & Data Protection

- **Data Backup Management** – Monitoring end-user backups and verifying backup completion.
- **Backup & Recovery Support** – Assisting with data restoration and backup maintenance.

BFSI Trading Infrastructure

- **Trading System Support** – Technical support for trading systems within a SEBI / NSE / BSE regulated environment.
- **BOD / EOD Operations** – Performing daily system checks and readiness validation for trading infrastructure.
- **Trading Platform Support** – Monitoring and supporting MoneyMaker trading platform operations.

- Performed basic system setup and software installation for new user machines.
- Maintained documentation and internal IT system records.
- Managed IT asset inventory tracking and coordinated hardware repairs with vendors.
- Performed initial network connectivity checks (LAN, IP configuration) before escalation.

PROJECTS

IT Asset & Inventory Management Platform

Technologies: Python, Flask, SQLite & Pandas

- Developed a full-stack internal web application to manage organizational IT assets, including hardware, software licenses, and maintenance records with real-time status tracking across departments.
 - Implemented role-based access control (Admin/Manager/User) with Two-Factor Authentication (2FA via TOTP), CSRF protection, rate limiting, and security event logging for enterprise-grade security.
 - Built automated alerts for software license expiry, asset repairs, and purchase request approvals with in-application notifications.
 - Designed a comprehensive audit trail capturing asset changes with timestamps, and generated exportable reports using Pandas for analysis and audits.
 - Ensured production-ready code quality, including input validation, secure database interactions, timezone-aware logging (IST), and stable deployment using a WSGI server.
-
